

Hey — thank you for downloading these textures! 🎉

These textures are completely free: feel free to use them in any of your projects, including commercial ones. No attribution is required, but a little thank-you goes a very long way.

If my work saved you time or helped your project look better, please do one tiny thing for me — leave a short comment under the tutorial video. A quick “Thanks!” or “Used this in my game!” only takes a few seconds, but it means the world and helps me keep making free assets and tutorials for everyone.

How you can help (takes under a minute):

- Leave a short comment under the video — it really helps. 🙏
- Give the video a like and subscribe if you want more free resources. 👍
- Follow or share on social media (links below) — spreading the word helps more than you think. 🔄

Why this matters:

Your feedback and small gestures (comments, likes, shares) let me know this work is useful and give me the energy to create more free packs, tutorials, and updates. I read every comment and absolutely appreciate your support.

Thanks again — have fun creating awesome things! ✨
